### ABOUT

A tech savvy and recent BIT graduate with problem solving attitude. Well-motivated person, enthusiastic about learning new things and looking for new challenges in IT field. Even though my degree does not provide any basics for Devops. I focused on doing my own personal project that covers major aspect of Devops.

### WORK EXPERIENCE

#### **Personal project.**

Developed a web scraping app with flask (python 3), stored it in GitHub repository. With GitHub action, build an CI/CD pipeline that would build the app dockerize it and push it to Docker hub. From docker hub successfully tested image in docker desktop and later successfully deployed on GCP-GKE  
Project repo and more info in my GitHub.
