SKILLS:

- AI & Automation: AI Agents, Prompt Engineering & Versioning, API Cost & Usage Tracking
- Monitoring & Logs: Error Log Analysis, Nginx/Server Logs, Metrics & Performance Tracking
- Testing & Quality Assurance: Automated Testing, End-to-End Testing, Regression Testing, CI/CD Pipelines
- Programming & Tools: Python, C#, Flask, REST APIs, Git, GitHub Actions, Linux CLI

EDUCATION:

LAB UNIVERSITY OF APPLIED SCIENCES

2018 - 2021

- Bachelor of Business Administration, Business Information Technology

AMAZON WEB SERVICES

- AWS certified Cloud Practitioner (2023)

PROFILE:

IT and Cloud Engineering professional with a BBA in Business Information Technology and hands-on experience in API integration, testing, data maintenance, and system automation. Skilled in analyzing error logs, troubleshooting data discrepancies across integrated systems, and managing project deployment workflows. Experienced in coordinating multi-stakeholder tech projects with a strong focus on system reliability, compliance, and process efficiency.

EXPERIENCE:

BIZBOT – MULTI-BUSINESS AI CHATBOT PLATFORM

(Personal Project | 2025 – Present)

- Architected and deployed a multi-tenant AI chatbot platform in Python, managing business-specific knowledge bases and AI prompt/response workflows.
- Tracked and optimized backend API performance, monitoring usage patterns and log data to ensure reliable and cost-effective AI service delivery.
- Containerized microservices using Docker and orchestrated deployments on Kubernetes, optimizing system scalability and uptime.
- Implemented automated testing and deployment workflows using GitHub Actions to maintain system stability and rapid error resolution.

DEVOPS & CLOUD ENGINEERING PROJECTS

- Built and version-controlled a Python (Flask) web service on GitHub, deploying containerized applications across AWS and GCP (GKE) environments.

- Engineered automated GitHub Actions CI/CD pipelines, streamlining testing and delivery workflows to reduce overall deployment times by ~40%.
- Provisioned scalable AWS EC2 cloud infrastructure using Terraform (IaC), standardizing repeatable environments for Dockerized microservices.

LINKNEST.CC – DYNAMIC WEB APPLICATION
(Personal Project | 2025)

- Engineered dynamic route handling and database queries to support custom URL generation and low-latency redirection.
- Implemented automated deployment workflows to deliver zero-downtime application updates and ensure high public availability.

OTHER EXPERIENCE:

CLEANER AND HOUSEKEEPER

N-Clean oy (07/2018 – 01/2022)

- Housekeeping & Facility Maintenance: Performed room cleaning and maintained daily housekeeping standards at Lahden Seurahuone and Scandic Lahti City.
- Time Management: Successfully managed job responsibilities alongside full-time university studies.
- Cultural Integration: Gained practical understanding and hands-on experience in Finnish workplace standards and culture.

SUSHI CHEF

Sushi-Take OY (01/2022 - 06/2026)

- Sushi Preparation & Quality: Handled precise preparation of high-quality sushi in a high-volume setting.
- Operations & Inventory: Maintained daily workplace standards and managed inventory efficiently.
- Customer Service & High-Stress Performance: Delivered excellent customer experiences under tight time constraints, building strong resilience, speed, and adaptability.

LANGUAGES & ADDITIONAL INFO:

- Languages: Finnish (A2 - developing), English (Professional / IELTS 6.5), Nepali (Native)
- Driving License: Category B (Full Finnish / EU license)
- Work Permit: Full working rights in Finland
